Zipper

Zipper

Zipper pull is a small piece of material that is attached to the zipper teeth. It is used to pull the zipper up and down. There are many different types of zipper pulls, including plastic, metal, and wood. Some zipper pulls are designed to be decorative, while others are designed to be functional. The most common type of zipper pull is a simple rectangular piece of plastic or metal. However, there are many other designs, including pulls that look like buttons, keys, or even small toys. Zipper pulls can also be made from natural materials like wood or bone. The choice of zipper pull depends on the style of the garment and the intended use of the zipper.
