
Spouted pouches

Spouted pouches have gained tremendous popularity worldwide and provide great convenience, spill control and food safety for many applications (i.e. liquid, semi-liquid, granular and powder products) Effectively replacing the can or the glass jar, flexible pouches (be they stand-up, quad or simple 3 side seal) have revolutionised retailing of many products.

The addition of a spout to any of these pack formats solves any dispensability or recloseability issues.

The production cost of the pouches with spout are obviously lower than cans, plastic bottles or glass bottles, and the cost of transportation and storage is obviously reduced. The insulation performance of the product is better than that of the bottle, and the packaged product can quickly cool and keep low temperature. In addition, a number of additional attributes of the design elements, such as handles, curve contours, tear notches and hang holes, etc.
